

GIVE YOUR AGENTS A GENOME

So a reset does not turn into terminal archaeology.

☒ TECHNICAL NOTES / BUILT FROM EVIDENCE

MORE TOOLS SHOULD NOT MEAN MORE CHAOS

A growing setup needs a way to keep the useful parts visible and reproducible.

- ◆ Keep what earns its place
- ◆ Inspect what changed
- ◆ Remove what no longer helps

THE IDEA

“

**THE GOAL IS NOT IDENTICAL
AGENTS. IT IS A SETUP THAT
CAN RECOVER ITS USEFUL
MEMORY.**

— Centralized Muscle Memory

THE PAYOFF

LESS DRIFT. FEWER SURPRISES.

Good capabilities become easier to reuse. Bad experiments become easier to leave behind.

- ◆ A clear home for useful knowledge
- ◆ A calmer reset path
- ◆ No accidental museum of old experiments

THE TEST

CAN THE SETUP SURVIVE A FRESH START?

If recovery requires a private checklist of remembered fixes, the system is carrying too much hidden history.

- ◆ Recover the working core
- ◆ Review the source
- ◆ Get back to work

YOUR TURN

WHAT EARNS PERMANENT CITIZENSHIP IN YOUR AI SETUP?

The answer should be easy to explain, reuse
and remove.

◆ DISCUSS / COMPARE / CHALLENGE
